

## **Brake cleaner**

Date: 16. July 2018

### **Description**

eurOsol Brake cleaner is a highly effective cleaning agent for drum and disc brakes, brake linings, clutch linings, printing plates and all parts in and around the car, which are contaminated with oil, grease, etc.. Due to the high proportion of active ingredient an intense and fast-acting cleaning is achieved. It is non-corrosive and in general does not damage rubber and plastic parts. However, because of the diversity of plastics present on the market, a compatibility test is recommended.

### **Product features**

- High content of cleaning agents
- Great cleaning effect
- agents and propellants contain ozone-depleting substances
- Removes old and gummy lubricants
- Highly effective
- 98% active ingredients

### **Usage**

Shortly shake and spray on the parts that needs to be treated. Spraying distance is about 20 - 30 cm. Clean up affected area with a clean cloth. To remove stubborn dirt - repeat the procedure. Wait the surface to dry. After drying, the part can be immediately further processed.

### **Durability and storage**

We guarantee a life span of 24 months in its original unopened packaging, at a storage temperature of -5 °C to +30 °C.
